

Name: _____

Theme Based Study Sheet

Cloud facts

Clouds are made up of millions of tiny droplets of water and ice.

Dark gray clouds that produces rain are called nimbostratus clouds.

The puffy clouds we often see floating in a blue sky are called cumulus clouds.

Stratus are low clouds, middle clouds are altostratus, and cirrus are high clouds.

How many more clouds facts can you find?

Writing a narrative

Write an imaginative narrative (story) about the day when all the clouds disappeared and it was up to you to find out what happened and bring them back.

Plan your story.

Who are the people in your story?
(characters)

Where does the story take place?
(setting)

What things happen? (sequence of events)

How does your story end? (resolution and conclusion)

Complete the sentences

_____ is simply a cloud that has formed near the ground.

Clouds move with the _____.

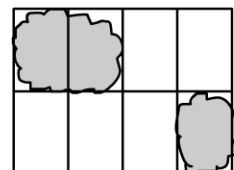

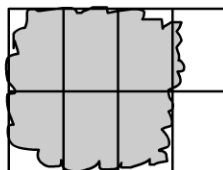

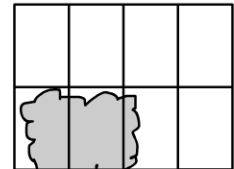

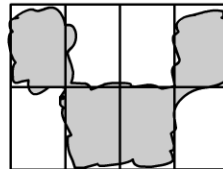

Without clouds there would not be any _____, thunderstorms, rainbows, or snow.

wind rain Fog

Fractions

The grids below show my window and the clouds on four separate days.

How many eighths of the window did the clouds cover each day?

Cloud drawings

Make three separate drawings of clouds. Think about the colors and the mood of each drawing.

Drawing 1. Dark threatening storm clouds.

Drawing 2. Puffy white clouds on a clear blue sky.

Drawing 3. A beautiful sunrise or sunset with the sun projecting between the clouds.

Which drawing do you like best?

Why do you like it?
