

Name: _____

Mixed Tables 5 x - 12 x

$10 \times 8 = \underline{\quad}$ $12 \times 7 = \underline{\quad}$

$12 \times 9 = \underline{\quad}$ $9 \times 10 = \underline{\quad}$

$10 \times 10 = \underline{\quad}$ $12 \times 12 = \underline{\quad}$

$12 \times 6 = \underline{\quad}$ $7 \times 8 = \underline{\quad}$

$9 \times 11 = \underline{\quad}$ $10 \times 6 = \underline{\quad}$

$7 \times 10 = \underline{\quad}$ $12 \times 7 = \underline{\quad}$

$7 \times 8 = \underline{\quad}$ $11 \times 7 = \underline{\quad}$

$7 \times 12 = \underline{\quad}$ $7 \times 6 = \underline{\quad}$

$6 \times 10 = \underline{\quad}$ $6 \times 11 = \underline{\quad}$

$11 \times 9 = \underline{\quad}$ $6 \times 10 = \underline{\quad}$

$12 \times 11 = \underline{\quad}$ $7 \times 9 = \underline{\quad}$

$9 \times 11 = \underline{\quad}$ $8 \times 7 = \underline{\quad}$

$12 \times 7 = \underline{\quad}$ $10 \times 11 = \underline{\quad}$

$10 \times 10 = \underline{\quad}$ $11 \times 11 = \underline{\quad}$

$10 \times 6 = \underline{\quad}$ $10 \times 10 = \underline{\quad}$

$11 \times 6 = \underline{\quad}$ $8 \times 8 = \underline{\quad}$

$10 \times 12 = \underline{\quad}$ $6 \times 11 = \underline{\quad}$

Working Mathematically

- 1) Mrs Polly bought 8 dozen oranges for our cross country run.

How many oranges did she buy? _____

1 dozen oranges

- 2)  Our Basketball competition has 11 teams. Each team has 7 players plus 2 reserves.

How many people play in the competition? _____

- 3) Glasses come in trays of 12. We hired 8 trays for our party.

How many glasses did we hire? _____

- 4) There are 11 members on each team playing netball in the competition.

How many people play in the competition if there are 9 teams? _____

- 5) Harry has organised his football cards into rows of 12 in his display book. How many cards on a page if there are 7 rows? _____
