## Starry Nights, Van Gogh Style

*Examine Vincent Van Gogh's night time images.*

*Image left: 'The Starry Night', painted in 1889, one of Vincent's most recognizable paintings. (See two more of Van Gogh's paintings on the next page.)*

*Describe how he brings the light of a starry night to life in his paintings.*

**Use vibrantly applied crayon resist and a watercolor wash to create your own night time landscape in the style of Vincent Van Gogh.**

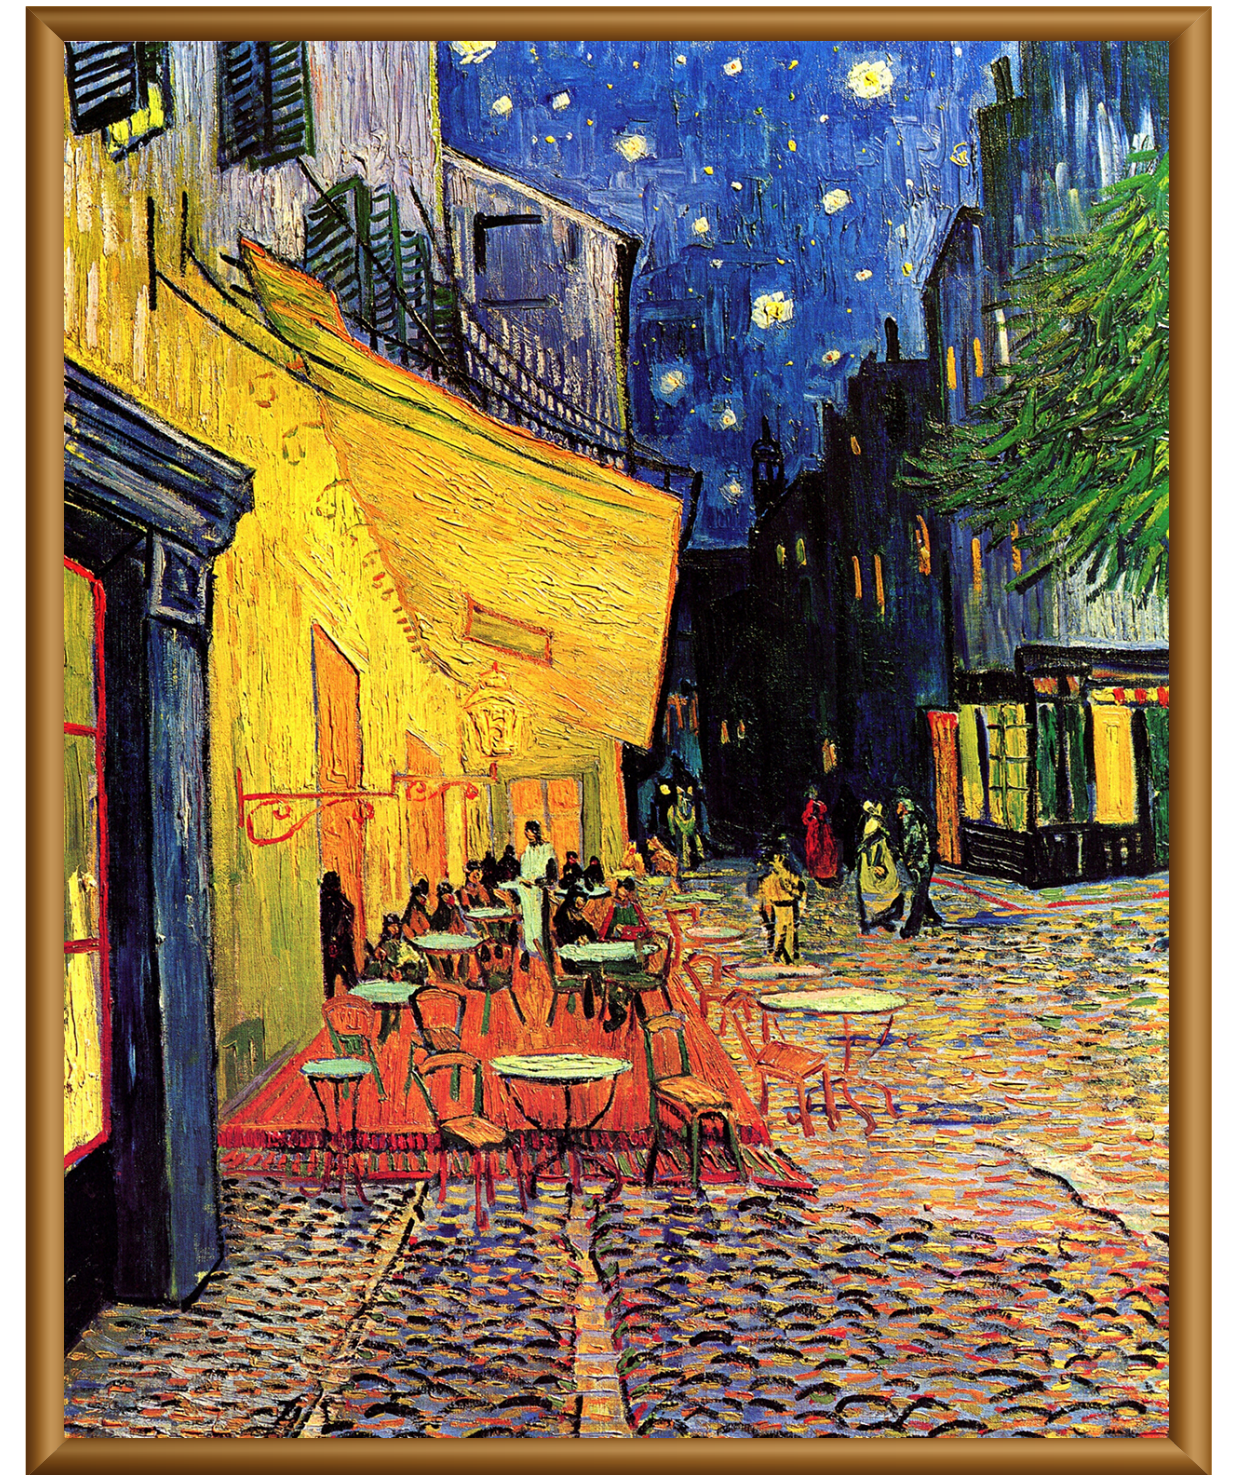

- Use strong, free movements and draw lots of individual lines, close together to represent the way light of the moon and stars is reflected on water.
- Use watercolors over the top of your crayons to make the colors stand out.

*Starry night over the Rhône, 1888*
