Concrete Poetry

Concrete poetry is also known as shape poetry or pattern poetry.

The words of concrete poetry are written in a shape that relates to the subject of the poem.

The visual shape of the concrete poem is more important than the sound of the poem.

The words do not need to rhyme. They can be written in phrases or simply be strung together as a collection of related words.

Try your luck with this shape as a guide:

Brainstorm
words that
describe
snakes!
