

CLAY PRODUCTS

Name:

Date:

Experiment Aim:

To find out what effect glaze has on how porous a clay pot is.

Materials Needed:

Clay pots, both glazed and unglazed, water, paper

What to do:

1) Place a glazed pot on a piece of paper towel.

Fill the pot with water.

2) Place an unglazed pot on a paper towel.

Fill the pot with water.

3) Leave the pots for a few hours and see what happens.
