

A composite image of space exploration. The foreground shows the curved horizon of Earth with blue oceans and white clouds. In the upper left, a large, detailed moon is visible. In the center-left, a rocket is shown launching, leaving a bright orange and yellow trail of fire and smoke. The background is a deep black space filled with numerous small, distant stars.

Significant Moments in Space Exploration History

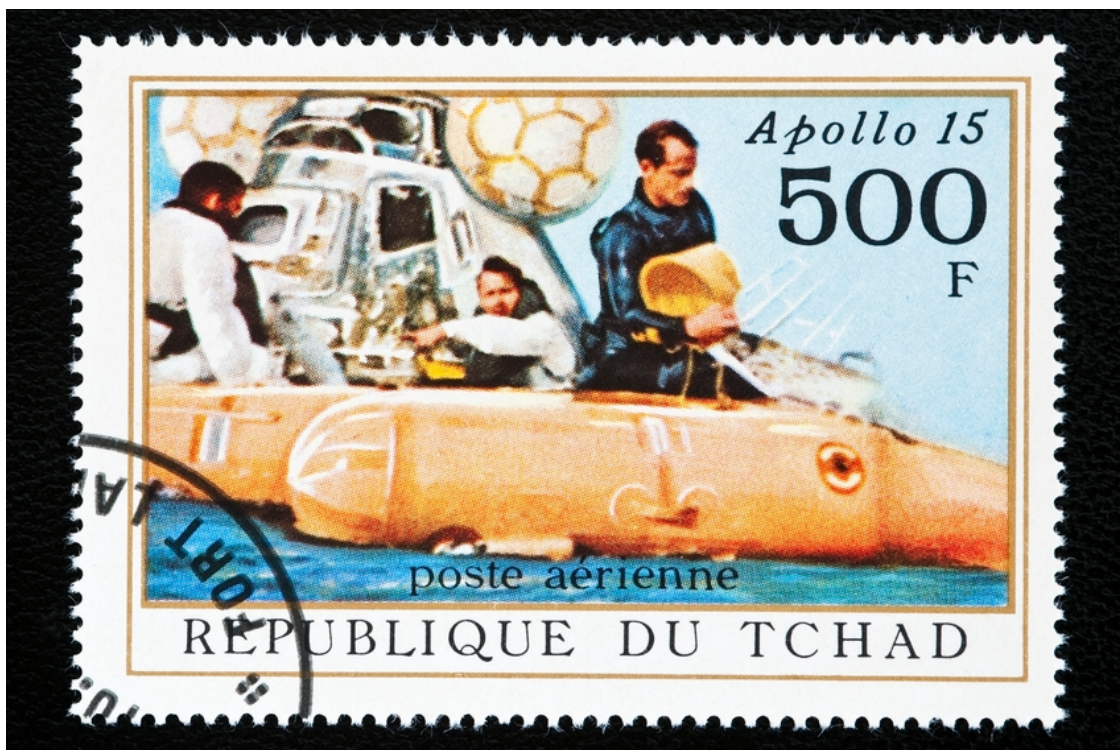

Study*ladder*

Significant moments in history have been celebrated in stamp designs for many decades.

Many people were inspired by the success of the first space exploration programs. Their achievements were celebrated in great stamp designs all over the world.

Find a recent space exploration significant event.

Design your own commemorative stamp design for that event.
