

Name:

Mental strategy for multiplying a two-digit number by a one-digit number

When mentally multiplying a two-digit number by a one-digit number, start by multiplying the tens, then the ones, and finally add the two results together.

For example: 37×6

Multiply the tens: $30 \times 6 = 180$ Multiply the ones: $7 \times 6 = 42$

Add the results: $180 + 42 = 222$

	Multiply the tens	Multiply the ones	Add the results
1) 23×3			
2) 32×4			
3) 62×5			
4) 57×4			
5) 48×6			
6) 63×5			
7) 45×7			
8) 73×6			
9) 64×8			
10) 95×6
