

Measuring in Millimeters

A square is a shape with four equal sides.

Draw two squares. The first with 3 centimeter (3 cm) sides and the second with 4 1/2 centimeter (4.5 cm) sides.

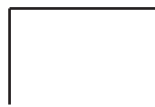

The starting point for each shape is shown.

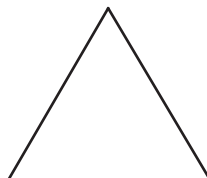

A rectangle has four sides. The two opposite sides of a rectangle are the same length.

Draw a rectangle with two 42 millimeter (42mm) sides and two 7 centimeter (7 cm) sides.

Make the 7 cm side go across the page.

Draw a triangle with three equal sides. Make each side 6 1/2 centimeters (6.5 cm) long.

***On each shape label the length of each side in millimeters.*
