

Name:

Mental strategy for adding two-digit numbers

When mentally adding two-digit numbers, start by adding the tens, then the ones, and finally, add the two results together.

For example: $37 + 56$

Add the tens: $30 + 50 = 80$ Add the ones: $7 + 6 = 13$

Add the results: $80 + 13 = 93$

	Add the tens	Add the ones	Add the results
1) $23 + 45$			
2) $36 + 53$			
3) $62 + 27$			
4) $55 + 37$			
5) $48 + 46$			
6) $66 + 35$			
7) $62 + 83$			
8) $74 + 56$			
9) $69 + 72$			
10) $96 + 87$
