Name: *5x tables*	
Question 1 *Sarah goes to school 5 days a week. How many days does she go to school in 9 weeks?*	
Question 2 *Dan collected 5 shells a day for 3 days. How many shells did Dan collect altogether?*	
Question 3 *To paint his house Andrew worked for 5 hours each day. If it took 8 days, how many hours did it take Andrew to paint his house?*	
Question 4 *Each box has 5 cans of beans. How many cans of beans in 7 boxes?*	
Question 5 *There are 5 balls in each basket. How many balls in 5 baskets?*	
Question 6 *For the school photo the children stood in 4 lines with 5 children in each line. How many children in the photo?*	
Question 7 *Cam bought her team new playing uniforms. She bought 2 packets each with 5 uniforms. How many uniforms did Cam buy?*	
Question 8 *In the pond there are 6 lily pads. On each lily pad there are 5 frogs. How many frogs in the pond?*	
Question 9 *In my class there are 6 reading groups with 5 children in each group. How many children in my class?*	
Question 10 *Each container has 5 brushes. If there are 10 containers, how many brushes altogether?*	

5x tables solutions

Question 1 *Sarah goes to school 5 days a week. How many days does she go to school in 9 weeks?*	*Solution* *To calculate how many days Sarah goes to school in 9 weeks, multiply the number of days in a week she goes to school by the total number of weeks.* *9 x 5 = 45*
Question 2 *Dan collected 5 shells a day for 3 days. How many shells did Dan collect altogether?*	*Solution* *To calculate the number of shells Dan collected altogether, multiply the number of days he collected shells by the number of shells he collected each day.* *3 x 5 = 15*
Question 3 *To paint his house Andrew worked for 5 hours each day. If it took 8 days, how many hours did it take Andrew to paint his house?*	*Solution* *To calculate the number of hours it took Andrew to paint his house, multiply how many hours he worked in a day by the number of days he worked.* *8 x 5 = 40*
Question 4 *Each box has 5 cans of beans. How many cans of beans in 7 boxes?*	*Solution* *To calculate the total number of cans of beans in 7 boxes, multiply the number of cans of beans in a single box by the total number of boxes.* *7 x 5 = 35*
Question 5 *There are 5 balls in each basket. How many balls in 5 baskets?*	*Solution* *To calculate the number of balls in 5 baskets, multiply the number of balls in one basket by the number of baskets.* *5 x 5 = 25*
Question 6 *For the school photo the children stood in 4 lines with 5 children in each line. How many children in the photo?*	*Solution* *To calculate the total number of children that were in the photo, multiply the number of lines of children by the number of children in each line.* *4 x 5 = 20*
Question 7 *Cam bought her team new playing uniforms. She bought 2 packets each with 5 uniforms. How many uniforms did Cam buy?*	*Solution* *To calculate the total number of uniforms Cam bought, multiply the number of packets she bought by the number of uniforms in each packet.* *2 x 5 = 10*
Question 8 *In the pond there are 6 lily pads. On each lily pad there are 5 frogs. How many frogs in the pond?*	*Solution* *To calculate the total number of frogs in the pond, multiply the number of lily pads by the number of frogs on each lily pad.* *6 x 5 = 30*
Question 9 *In my class there are 6 reading groups with 5 children in each group. How many children in my class?*	*Solution* *To calculate the number of children in the class, multiply the number of reading groups by the number of children in each group.* *6 x 5 = 30*
Question 10 *Each container has 5 brushes. If there are 10 containers, how many brushes altogether?*	*Solution* *To calculate the total number of brushes, multiply the number of brushes in each container by the number of containers.* *5 x 10 = 50*
