

Container Hunt

Go on a container hunt around your home.

Look for 10 containers that are measured in either milliliters or liters.

Draw each container that you find and record its capacity.

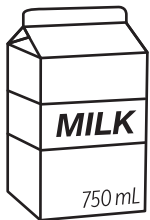

Do make sure that you ask an adult first. (Always ask for help with any glass or sharp-edged containers)

Most store bought items have the capacity written somewhere on the container.

This carton of juice has a capacity of 1 liter.

Container Hunt

Milliliters

750 milliliters

Liters

The abbreviation for liters is (L) and for milliliters (mL).

There are 1000 milliliters in 1 liter.
