

Measuring in Centimeters

A square is a shape with four equal sides.

Draw two squares. The first with 3 centimeter (3 cm) sides and the second with 5 centimeter (5 cm) sides.

The starting point for each shape is shown.

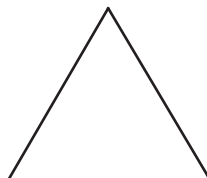

A rectangle has four sides. The two opposite sides of a rectangle are the same length.

Draw a rectangle with two 4 centimeter (4 cm) sides and two 7 centimeter (7 cm) sides.

Make the 7 cm side go across the page.

Draw a triangle with three equal sides. Make each side 6 centimeters (6 cm) long.

***On each shape label the length of each side.*
